PRICE-LIST 1933

A. N. PIERSON · CROMWELL, CONNECTICUT

SOUVENIR

PLANT PATENT NO. 25

A GOLDEN YELLOW SPORT OF TALISMAN, originating with us in 1930, and the Rose for which Plant Patent No. 25 has been issued. The color is a beautiful shade of yellow, suffused at times with a slight flush of pink, this flush of pink depending upon weather conditions. This tinge only adds to the attractiveness of the Rose. It is a dark enough yellow to show up well under artificial light, and under practically all conditions the color is as good and as usable a yellow as the Rose Souvenir de Claudius Pernet, from which Talisman is a seedling; and it is to be remembered that Souvenir is a sport from Talisman, so that the yellow color of Souvenir is merely a reversion to the color of Souvenir de Claudius Pernet in this sport.

We have, from time to time, counted the petals. As with all Roses, the petalage varies under different conditions and seasons. On November 1 we counted one of the larger flowers, running as high as 53, but Souvenir is at its best where the growths are smaller and the average petalage about 35. As a 15- to 18-inch Rose, rather than as a special, Souvenir will be found all that can be desired in a yellow Rose.

Souvenir is a better grower than Talisman. It is a big producer and it has a heavier, stronger neck as well as stem, and this improvement over the stem of Talisman was much needed. It is the best yellow Rose we know of today.

Souvenir was disseminated by us in the spring of 1932 under contracts with the various growers to whom Souvenir was sold, the actual distribution being, up to and including November 15, 1932, 397,992 plants, in addition to 100,000 buds supplied to the Jackson & Perkins Co. for the production of outside Roses. Souvenir has been well received by the Rose-growers throughout the country, and is today sold in practically every flower-market in America.

We have experimented with growing Souvenir on Odorata as well as on Manetti stock, and we are convinced that there is nothing to be gained by grafting Souvenir on Odorata, that Manetti stock is, if anything, superior to Odorata for growing Souvenir. We shall, therefore, in the season of 1933, confine our grafting of the variety entirely to Manetti.

TERMS. For the reason that we believe those men who purchased Souvenir at novelty prices during the spring of 1932 deserve the protection of not being subjected to the unfair competition of those who might purchase the Rose at a reduced figure this season, we have decided to maintain, for 1933, the same prices asked by us during the year of dissemination. All sales must be covered by a contract agreement between the purchaser and us, as was the case in 1932.

PRICES: \$45 per 100 \$400 per 1000

\$375 per 1000 in 5,000 lots \$350 per 1000 in 10,000 lots

SCIONS are offered for January and later at \$15 per 100; \$140 per 1000; \$130 per 1000 in 5000 lots; \$120 per 1000 in 10,000 lots.

The following firms, under contract with A. N. Pierson, Inc., are authorized to sell grafted plants and scions of Souvenir for greenhouse planting:

WHITE BROTHERS CORPORATION, Medina, N. Y. THE HILL FLORAL PRODUCTS Co., Richmond, Ind.

CHARLES H. TOTTY, Madison, N. J. ANDERS RASMUSSEN, New Albany, Ind.

The exclusive rights for the sale of Souvenir as field-grown, budded plants for outdoor growing, and the rights to sell budded Souvenir for greenhouse growing have been granted to Jackson & Perkins Co., of Newark, N. Y.

The Canadian representative who alone has the right of dissemination of Souvenir in Canada is Richmond Roses, Ltd., 107 Simcoe St., Toronto, Ontario.

A. N. PIERSON, INC.

CROMWELL . CONNECTICUT

The rose SOLIVENIR to which this agreement applies is the vellow enert of Teliamen existing with A. N. Riersen

The rose SOUVENIR to which this agreement applies is the yellow sport of Talisman originating with A. N. Pierson, Incorporated, of Cromwell, Conn., registered by them with the American Rose Society.

SOUVENIR is the property of A. N. Pierson, Inc., and patent No. 25 has now been granted to A. N. Pierson, Inc., covering this rose.

We the undersigned, as purchasers of the rose SOUVENIR, recognize the exclusive rights of reproduction as the property of A. N. Pierson, Inc., and agree that the purchase by us of plants or scions is for the sole purpose of producing cut-flowers, and we do agree that we will not knowingly sell flowers, scions, buds or grafts of SOUVENIR for the purpose of reproducing the variety, nor reproduce the variety by any method unless empowered by A. N. Pierson, Inc., by special license to do so.

We do agree not to export flowers of the variety to any foreign country including Canada, and when plants purchased by us have outlived their usefulness to us, not to dispose of them but to destroy the same, the rights of the production of SOUVENIR for outside growing having been retained by A. N. Pierson, Inc., or disposed of under license to other parties; and we do agree to at all reasonable times allow A. N. Pierson, Inc., or their representatives the right to inspect and inventory our planting of Souvenir.

This license to grow Souvenir is granted by A. N. Pierson, Inc., to the undersigned, his (their) assigns and successors, and is non-exclusive, non-divisible and non-transferable, and violation by the undersigned of these terms shall be sufficient reason for the cancellation of this contract that is granted for the life of the letters patent or for so long as the undersigned may continue to grow SOUVENIR.

A. N. PIERSON, Inc.

License to Reproduce Souvenir

The rose SOUVENIR to which this agreement applies is the yellow sport of Talisman originating with A. N. Pierson, Incorporated, of Cromwell, Conn., registered by them with the American Rose Society, and to which Plant Patent No. 25 has now been granted.

- A. N. Pierson, Incorporated, the owners of the rose SOUVENIR and who have (has) applied to them for the right to reproduce Souvenir for the purposes of producing plants for their (his) own growing for the production of cut-flowers, do hereby contract and agree as follows:
- A. N. Pierson, Incorporated, grants to....., and to their (his) successors and assigns of their (his) business, the non-exclusive, non-divisible license to asexually reproduce such plants of Souvenir as may be required for the planting of this variety by them (him) during the life of the letters patents granted for the rose Souvenir, or during the years in which they (he) continue to grow and reproduce the rose Souvenir,.....agreeing that no reproduction shall be made during the year 1932.
- number of new plants actually set during the preceding season and which are not plants upon which a royalty has previously been paid; and to pay to A. N. Pierson, Incorporated, the sum of ten cents for each plant that has been reproduced by them (him) and actually set in beds or benches. This account shall be payable on July 15th.
-agree to destroy and not dispose of any plants that may be produced in surplus and not be required by them (him) for their (his) exclusive planting for cut-flower purposes.

It is understood and agreed that violation of this agreement by either the failure to make annual reports to A. N. Pierson, Incorporated, or to make payments of royaltics as may be due or violation of the restriction as to the selling of Souvenir, either plants or scions for the purpose of reproducing plants, shall be sufficient cause for the cancelling of this contract and the withdrawal by A. N. Pierson, Inc., of the right to make reproduction of the variety Souvenir.

A. N. PIERSON, Inc.

List of Purchasers of Souvenir on November 15, 1932, with the Number of Plants Which They Have a Legal Right to Grow for the Purpose of Producing Cut-Flowers, a total of 397,992

Alabama:

100 Rosemont Gardens, Inc., Montgomery

California:

25 Amling Brothers, Santa Ana

3000 Armacost & Royston, Los Angeles

2000 Avansino & Mortenson, San Francisco

50 Ferrari Brothers, San Francisco

1200 Groen, C. J., Montebello

CHASE GARDENS, Eugene, Ore. GEORGE B. HART, Rochester, N. Y. E. W. McLellan & Co., Burlingame, Calif. T. L. METCALFE, Hopkinsville, Ky.

NEW ROSE, MARY HART

Plant Patent No. 8

(GEORGE B. HART)

THERE are, at the date this is written (November 25, 1932), according to those who profess to know facts, over thirty applications on file at the office of the Patent Bureau for new Roses that are sports of Talisman. Many of these, no doubt, are identical with Talisman and many are but slight, if any, improvement on that variety. It is the radical break in color that makes for value in sports. First Souvenir and now Mary Hart are radically different from the parent in color. They have not lost the strength, vigor, and producing power of Talisman, and in some points they excel.

MARY HART was recognized and propagated by George B. Hart at his Fairport, N. Y., range of Rose-houses. It appealed to us because of its brilliant scarlet color. We have planted 4000 plants and are assisting George B. Hart in its dissemination. While it is a brilliant scarlet, its color is not to be confused with the crimson of Senior and Templar. The scarlet in Mary Hart has a salmon base which sometimes shows in the center petals and also in the color of the open or fading flower. This salmon tinge is by far less noticed in the medium and shorter grades, and appears mostly on the extremely heavy growths. Mary Hart is at its best as to color, form of flower and stem as a 12- to 18-inch Rose, and that is the real Rose of commerce.

The flower is carried on a stem equal to or better than that of the parent. It is a free-flowering, brilliant scarlet Talisman, unlike any other sport of Talisman known to us. A distinct and valuable Rose for the average Rose-grower.

We offer grafted plants only, all scion rights being reserved by George B. Hart.

PRICES: 21/4-inch grafted plants

\$45.00 per 100 \$400.00 per 1000, in 1000 to 3000 lots \$375.00 per 1000, in 3000 to 7000 lots \$350.00 per 1000, in 7000 to 50,000 lots

Subject to Contract for Growing Cut-Flowers Only

NEW ROSE, MARY HART

Plant Patent No. 8

NEW ROSE, SENIOR

Plant Patent No. 2

(FRANK SPANBAUER)

THIS valuable new Rose is owned and patented by Frank Spanbauer, of Medina, N. Y., and is a crimson seedling resulting from a cross of Richmond, a Rose well remembered by the Rose-growers of America, and the old, deep crimson favorite of the garden, General Jacqueminot. The first dissemination of this Rose was made during the spring of 1932, and it has been favorably received by growers and retail florists. It is, by comparison, a large Rose. The color is deep

crimson, and, like all Roses of that color, it needs clear, bright weather to produce it at its best. It makes good, stiff stems and produces at least the average quantity, as compared to the best Roses of commerce outside the Talisman family. Templar has been, and still is, a standard for this red or crimson class, but to many growers Senior appeals on the basis of keeping quality and strength of stem. We planted 7000 Senior this past spring and shall materially increase our planting.

PRICES. 21/4-inch grafted plants:
Subject to Contract for Growing
Cut-Flowers Only

\$40.00 per 100 \$350.00 per 1000 \$340.00 per 1000, in lots of 2500 \$330.00 per 1000, in lots of 5000 \$320.00 per 1000, in lots of 7500 \$300.00 per 1000, in lots of 10,000

NEW ROSE COUNTESS VANDAL (Illustrated on page 11)

Plant Patent No. 38

(JACKSON & PERKINS COMPANY)

THIS Rose, covered by Plant Patent No. 38, is a new seedling variety. Ophelia, from which Mme. Butterfly is a sport and which as a parent plant has entered into many of our finest Roses of today, together with Mrs. Aaron Ward, with its wonderful production and its coppery color, and Souvenir de Claudius Pernet are the parent varieties back of Countess Vandal. Below follows the introducer's description:

"Countess Vandal has an unusually long, tapered bud, generally 2½ to 3 inches long and over. It keeps well at that stage, with green sepals tight to the bud. The first color is bronzy orange-carmine, graduating to yellow at the base. As the bud develops, the bronze lightens to orange-pink, and the inside of the petals shows a blend of pink, chamois, and gold. The flower is fairly double, having 30 to 35 petals. The stems are long and rigid and the large, ample foliage is deep green

in color. It is a heavy and continuous producer. The shipping and keeping qualities of Countess Vandal are excellent, and we find that it grows best at the temperature of Talisman."

In the search for newness and for variety needed to hold the public interest in Roses, the fact has been impressed upon us that the color of Countess Vandal is new to the Rose trade of today, and that there is a demand for this variety from those who discriminate in Roses. If there be faults—and these are usually to be found, for instance, the fact that it does not always come up to the petalage given is most noticeable—yet it has proved from trials made with us to be a good-keeping flower as well as a pleasing distinct novelty.

A. N. Pierson, Inc., offer only grafted plants for April and later delivery, subject to contract for growing cut-flowers only.

PRICES. 21/4-inch grafted plants:

\$45.00 per 100 \$400 per 1000 \$375.00 per 1000, in 5000 lots \$350.00 per 1000, in 10,000 lots

NEW ROSE, SENIOR (Frank Spanbauer)
Plant Patent No. 2

GENERAL LIST OF GREENHOUSE ROSES

TE GROW grafted Roses for greenhouse planting in large quantities. This season we shall graft about 700,000. We do not grow own-root Rose plants. With few exceptions, these Roses are better grafted on Manetti stock than when grown on their own roots. Stronger plant, s increased production, and flowers of better quality are obtained from the grafted plant. Making a comparison between grafted and own-root Roses, both subjects being selected as fair samples, the grafted plant at once shows a superiority which it maintains.

We can fill your retail orders for Rose plants. We have built for ourselves a reputation for producing the best Rose-stock that can be grown. That reputation is ours to maintain. For private work, we advise the use of plants from 3-inch pots, shipped when ready for planting, or at least a month before needed if they are to be repotted into 4-inch pots. When you wish us to repot your order, allow four weeks for the shift from 21/4- to 3-inch pots, and six weeks for the shift from 3- to 4-inch pots. After May 1 we are usually able to fill orders for any varieties listed from 3-inch pots.

Order Your Roses Now.

Plants from 3- and 4-inch pots: Minimum charge, 50 cts.; 50 or more plants, \$1.50 per 100
No packing charges on prepaid orders

JOANNA HILL

The wonderful yellow Rose pronounced by wholesalers, and retailers as well, to be the best yellow Rosc yet introduced. It is a seedling of Amelia Gude and Mmc. Butterfly. The blooms are clear yellow, deepening at the center, and hold their color under artificial light. It produces strong stems without pinching, and can be grown at low cost and sold at a more reasonable price than Souvenir de Claudius Pernet.

RAPTURE

In practically all respects, Rapture is a rose-pink Butterfly with, under good conditions of growth, a slight increase in petalage. It has not been quite so good a grower as the parent, but as the season has advanced it has shown improvement in this respect. While it is somewhat closer jointed and docs not tend to as long stems, this is compensated for by the fact that the trade likes the Rose for its coloring, and it sells at a slighter higher price on the market. There is room for Butterfly and for Rapture. They are cnough different to be distinct, and both good enough to deserve general culture.

BRIARCLIFF

One might almost say the Universal Rose. There has never been in commerce a variety in its color that has had the same recognition. Briarcliff has supplanted Columbia entirely, and, without a doubt, there are more grown today than of any other Rose except, perhaps, Premier and its sports.

DOUBLE WHITE KILLARNEY

The leading and best white Rose ever grown, when quality of bloom is considered. There have been many sports of White Killarney, but this Rose, known as the Budlong strain, has shown superiority to the other sports in every respect, and it is recognized today that Double White Killarney means the Budlong strain. It is pure white, and the flowers are of great substance.

HOLLYWOOD

Similar to but brighter and better than Premier Supreme is the story of Hollywood. In its first year with us it has proved that it is brighter and better in color, and shows now that it may equal Supreme as a grower. A mighty fine Rose.

MME. BUTTERFLY

A sport of Ophclia which carries on so many of the excellent qualities of its parent that it is, without doubt, the most widely grown and the most popular Rose in its color—shell or flesh-pink with the Ophelia shadings deepened and intensified. A real commcreial sort, good from the grower's standpoint. A good Rose to ship, a good Rose from the retailer's standpoint, and a popular Rose with the public. In growth Mmc. Butterfly is surpassing the parent and this feature alone recommends it to all. Foliage, stem, and flower are all Ophelia—improved and glorified.

PREMIER SUPREME

To those who have gone from Columbia to Briarcliff, and those who went from Ophelia to Butterfly, the casting aside of a parent for an offspring is not a new story. Premier Supreme has had a good, fair trial throughout the country, and has not been found lacking in the essentials of a good Rose, and the merits of this growt have now become known. sport have now become known.

TALISMAN

We have, this year, 50,000 plants of Talisman growing on our place, and it is one of the freest-growing, easiest handling varieties

place, and it is one of the freest-growing, casiest handling varieties that we have ever had growing in the greenhouse benches. The color is very hard to describe. It is a combination of yellow and copper, suffused with pink in the bud.

It is amply double to be a good commercial cut-flower Rose, and yet a Rose of this petalage will open freely and easily, being in the open form somewhat similar to Butterfly—although the petal is larger and heavier than the petals of Butterfly.

As the flower opens, as with all Roses earrying these yellow and copper shades, it changes color, and the half-open color carries a decidedly old-rose pink above the yellow base, and as this fades to lighter pink, the deeper pink that is in the original flower becomes more intensified, probably by contrast. It is a very charming color but one that it is almost impossible to describe accurately and that is entirely distinct from anything we have had in comand that is entirely distinct from anything we have had in commerce for cut-flower purposes.

MRS. R. M. FINCH

A new Polyantha Rose that has become very popular with the trade who know it, for greenhouse growing for a Rose of the Baby Rambler type. Rose or shell-pink in color, larger than the well-known Cécile Brunner.

NEW ROSE, COUNTESS VANDAL

Plant Patent No. 38

A. N. PIERSON, INC., CROMWELL, CONN.
